

**Below are common questions about QuatSan and the Rapid Mist 1400. If you do not find your question or answer, please contact us at 800-567-1443 or [info@wheelhouseindustries.com](mailto:info@wheelhouseindustries.com).**

### **FAQ's - QuatSan**

#### **Is a Quat based product preferred over Quat-free sanitizer?**

Yes – Sanitizers that are stated as “Quat-free” are mainly alcohol-based and have a distinct difference in what is left once the alcohol evaporates. When you use a quat sanitizer, when the alcohol in the quat solution evaporates, it leaves behind the quaternary ammonia as a residual that will continue to work on breaking down germicides on the surface.

#### **Can I use the QuatSan to spot clean?**

Absolutely. Simply read the directions for making smaller quantities. Remember, if you are pouring the product into another container please be sure to apply a QuatSan label on it to ensure proper product use. If you do not have one, we will provide one for you.

#### **I've read about Quat products before, is it true they have multiple uses?**

Yes – QuatSan is known for its wide range of uses. Additional information can be found on the label and SDS sheet.

### **FAQ's – Rapid Mist 1400**

#### **Can the Rapid Mist 1400 easily be used as a power washer?**

The short answer is yes. The longer answer is, we all know that at one point in the future our sanitizing needs may change. During our designing, we wanted to address not just short term, but long term needs as well. So, whether you want to sanitize today or power wash tomorrow, you can do both. It takes less than a minute to switch between the 2.

#### **Do I have to fill up the 5-gallon bucket every time I use the machine?**

No – the sanitizer is marked so you can use as little as 1.5 gallons of diluted solution. Just make sure you keep enough liquid, so it is above the lower hose on the bucket.

#### **Can I add an additional hose to the hose reel to reach further distances?**

Yes – give us a call and we can provide an additional 75' length of hose which will still fit on the hose reel.

#### **Can I run 2 guns off the pump?"**

Yes – We can provide you with everything necessary to run 2 guns simultaneously, and even install 2 hose reels if you wish.
