4	FIRST AID MEASURES
----------	---------------------------

Inhalation: If symptoms develop, move victim to fresh air. If symptoms persist, obtain medical attention. Give oxygen or artificial respiration if needed. Call a physician if symptoms persist.

Skin Contact: Promptly flush skin with water until all chemical is removed. Remove contaminated clothing and wash before reuse. Consult a physician if irritation persists.

Eye Contact: Immediately flush eyes with large amounts of water for at least 15 minutes, lifting eyelids occasionally to facilitate irrigation. Get medical attention if irritation occurs and persists.

Ingestion: Do NOT induce vomiting. Drink large quantities of milk, if available. Call a POISON CENTER or doctor/physician if you feel unwell.

5	FIRE FIGHTING MEASURES
----------	-------------------------------

Flash Point: N/A

Suitable extinguishing media Water spray Carbon dioxide (CO2)

Special protective equipment and precautions for firefighters Wear self contained breathing apparatus and other protective clothing.

General fire hazards This material is non-flammable. If exposed to fire from another source, use extinguishing media suitable for that source.

6	ACCIDENTAL RELEASE MEASURES
----------	------------------------------------

This material is biodegradable. Wear personal protective equipment. Neutralize with copious amounts of water. Slowly add a soda ash mixture to residue. This mixture should be 10 pounds of soda ash to 5 gallons of water. This should bring the spill residue to within a normal pH range of 6-8.

7	HANDLING AND STORAGE
----------	-----------------------------

Handling Precautions: Do not get in eyes, on skin, or on clothing. Use in well ventilated area.

Storage Requirements: For safe storage, store between -15° C and 82° C. Store in original tightly sealed container. Store in well ventilated area. Keep out of reach of children.

8	EXPOSURE CONTROLS/PERSONAL PROTECTION
----------	--

Personal Protective Equipment: Phosphoric acid (7664-38-2) []

Personal protective equipment
Eye/face protection: Tightly fitting safety goggles.
Skin protection: Handle with gloves. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.
Body Protection: Complete suit protecting against chemicals, The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.
Respiratory protection: Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi- purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).
Control of environmental exposure: Do not let product enter drains.
