

THE INDUSTRY'S TRUE ORGANIC DESCALER

Simple. Effective. Organic.

Quantum Organic Descaler is 100% organic and non-toxic. As the only environmentally safe descaling product on the market, it offers a more stable and less harmful solution than any other product. Unlike other “inorganic” descaling products, Quantum Organic Descaler does not “eat, attack, or dissolve” calcium carbonate; it simply breaks the bonds for an eco-friendly cleaning solution. Quantum is designed for all metals, especially stainless steel as it passivates the surface as it cleans.

Why Should You Use Quantum Organic Descaler?

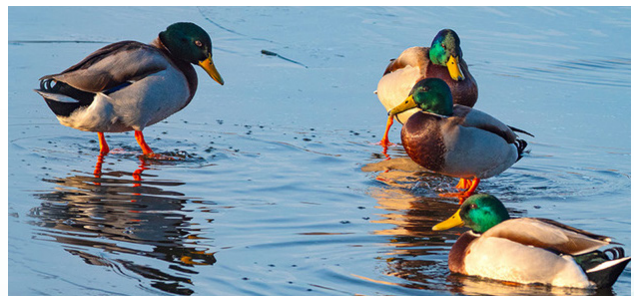

- 100% organic - protect employees, equipment, end users, and environment
- Lowers costs up to 40% of the job - NO neutralization required
- Can be used “as is” - no preheat/heat treatment is necessary
- Extends the life of your equipment with regular maintenance
- Cleans equipment down to its base metal without leaching or pitting of metal - even on aluminum
- It breaks down over 3 lbs of calcite (calcium carbonate) scale per gallon

The Proven Industry Leading Descaling Solution.

With Traditional In-Organic Descalers

With Quantum Organic Descaler
